CISC1000
Information Technology Fundamentals and Practices

About this course

CISC1000 is a foundational course that explores the impact of information technology in our modern society. CISC1000 is an online course that is accessible at UM-Moodle. Students may access the course at any time and find out all resources related to the course online, including course materials, video lectures and exercises. A weekly face-to-face Q&A tutorial hour via the Zoom and UMMoodle platforms will be arranged. Students from one RC are welcome to join the online tutorials from other RC if there are time clashes in their RC tutorial slots.

Online Examination

The examination will be conducted online. Students are required to register the examination at UM-Moodle:

https://ummoodle.um.edu.mo/course/view.php?id=98262

Students can register for the CISC1000 examination by signing up online for ONE examination session at a time from the exam schedule given. If students were to pass the examination, **P** grade should be recorded. If students did not pass the examination, they could sign up another examination session within a semester and retake the examination. There is no limit to the number of times students retake the examination. However, if students do not pass the examination within a semester, **NP** grade will be recorded, and students will be required to retake CISC1000 in the following semester.

The examination schedule will be announced at UM-Moodle.
